

CONSULTANT LUBRICANTS, INC.

"The Solution is Science®"

University of Missouri Research Park
9 Research Park Drive
St. Charles, MO 63304-5685

Consultant Lubricants, Inc. has been developing custom lubricant formulations and manufacturing advanced metalworking fluids for over forty years.

1105-CTS Corrosion Inhibitor

1100-CTS Diluted - Ready To Use

Top 4 Rust Related Challenges... and the Solution! 1105-CTS

- 1) Protecting Parts From Corrosion** - without using hazardous or flammable solvent based formulas. 1105-CTS is a clear, safe, VOC free, water based product, which is non-flammable and non hazardous.
- 2) Weld Over Residue** - After application and evaporation, the 1105-CTS dries down to an invisible, thin liquid coating. The dried film is easily removed or welded through/over without washing part first.
- 3) Evaporation Rate Of Water** - Residue dries at the same rate as water. While drying, this product does not emit any VOC's or fumes. It will not cause inhalation, skin irritation, pH or operator safety issues.
- 4) Impact On Painted Parts** - The 1105-CTS is VERY easily removed in water based cleaning system. In paint lines, 1105-CTS dried residue comes off easily in Stage 1 cleaning and will not contaminate or interfere with wash chemicals.

THE ADVENTURES OF GEORGE & RALPH

How do you like the new Corrosion Inhibitor, Ralph?

I guess she's ok but I kinda miss the old one.

What?! That brand was lousy and flammable! and didn't last long at all!

George, it's not nice to talk bad about your co-workers.

1105-CTS from CLI, is our go-to rust preventative, hands down!

George, you forgot to say, "Simon says."

The 1105-CTS is an oil free, water-based rust preventative. It may be used straight for best corrosion protection or diluted with water, depending on the length of protection time desired. Following water evaporation, 1105-CTS leaves behind a thin, virtually non-detectable clear film. The resulting film will not drip or run as oil-based products will. This film will not harden over time.

system. Even with ambient rinse water, the 1105-CTS is removed quickly and easily. In paint lines, 1105-CTS dried residue comes off easily in Stage 1 cleaning and will not contaminate or interfere with wash chemicals. The 1105-CTS rinsed residue will not generate a hazardous or oily waste stream.

This product is easily removed in water based cleaning
