Consultant Lubricants, Inc. has been developing custom lubricant formulations and manufacturing advanced metalworking fluids for over forty years.

9015-CLN Economical Floor Cleaner

"The Solution is Science"®

Top 4 Floor Cleaning Challenges... and the Solution! 9015-CLN

- 1) Safety** - Dirty or Oily Floors are a Safety concern. To help prevent slips falls, a quality cleaner is necessary or dirt and oil continue to accumulate.
- 2) Compatibility with Scrubber Machines** - Many formulations contain chemicals that attached elastomers seals and wipers. Whether it's mop cleaning or a scrubber machine, the 9015-CLN is compatible with equipment.
- 3) Dry Time and Residue** - Many cleaners contain slow drying components and can evaporate down to a powdered residue. The 9015-CLN concentrate is blended from deionized water and carefully selected additives that dries quickly and does not leave slippery or powdery residue on floor surface.
- 4) Efficiency** - Clean floors produce a safer and more pleasant work environment for the operators. Happy workers are more productive workers!

THE ADVENTURES OF GEORGE & RALPH

The new floor cleaner has sure helped spruce everything up.

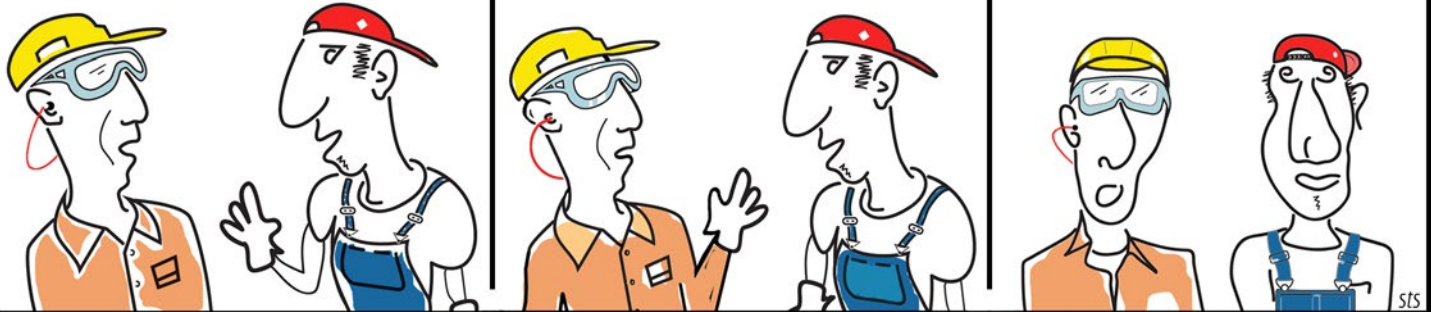

I kind of go for the rustic look myself.

Are you kidding? You could eat off this floor!

Been there, Done that!

I especially like the lack of a residue left behind.

and on the right behind!

9015-CLN is designed to remove both SOILS and OILS that can develop an accumulation of particulate and debris becoming more difficult to remove over time. It does not contain "butyls" or any other additive that could degrade rubber seals and wipers. The 9015-CLN provides safe and compatible cleaning power for operators and equipment.

9015-CLN provides LOW COST CLEANING. 9015-CLN offers significantly greater value than competing products. Dilution ratio is 5:1 to 20:1 depending on the application
